LEDs for each switch (SK6812 MINIS, Same pinout as a flipped WS2812B's, and allows for the holes to be drilled)
LED Bar
Space bar Extra LEDs
USB 3.0 Breakout for NUC
Vertical USB 3.0 Adapter (Goes in giant hole on PCB)
Pins to Hold Vertical USB port
NUC RGB Pinout
Blue
Grn
Red
USB 2 NUC adapter board
NUC Audio Extension
To NUC
USB 3.0 Switch (2 used, one for the 3.0 lines, one for USB 2 lines)
To USB 3.0 HubKeyb
Adafruit Buck Converter: Steps down 5v to 3.3v for USB switch
NUC Front Panel connectors
The two pinouts are just for the Power and Reset Buttons (I'm unsure of where to put them yet)
LEDs are HDD and Power
Pinout to configure LEDs
Not sure how I will configure them yet
To USB C
LEDDATA
SENSOFUN_PRO_MICRO
Extra Pin from a Pro Micro LED
LED Matrix, 8x9, 71 Keys (I don't need 72)
USB C Pinout
Used so that I can Replace the connector if I need to
Misc Switches, Some Might just be used for PwrRst or just personal Projects
